

Menu options:

To open the menu, click on the “Game” button located in the upper left corner.

New Game: Starts a new game with the options specified options applied

Best: This is a list of options for how many games you would like to win before an overall winner is declared. Options are:

- 1 of 1
- 2 of 3
- 3 of 5
- 4 of 7

Player vs Player/ Player vs PC: These two options are mutually exclusive and specify if you want to play against another human locally, or play against the computer.

The following options become available if Player vs PC is selected

Difficulty: Two options are available

- Easy: moves are made at random for the computer player
- Hard: moves are made with more calculation

Computer Character: Lets you choose to set the computer player to X or O

The final option listed it “Quit!” Click this to exit the game.

Once the Game is started, by clicking New Game: a board will appear, and if you chose to play a game with more than one game, a score count will appear in the upper region of the board. The score is the total number of games each player has won. Draw games do not count to the number of games or the score.
